Dear Interested Party,

It is with great pleasure that I recommend Aidan Von Feldt with my greatest confidence in their software development abilities. During the semester Aidan was enrolled in my course on Web Programming. Aidan fully engaged in the coursework and produced mastery projects that went well above the expected quality produced by the rest of the class. Aidan demonstrated mastery of building UI applications with HTML, CSS, JavaScript, and common web frameworks. To support the front-end, Aidan built complex back-end REST services powered by a cloud hosted database. This was all served up using their extensive knowledge of HTTP over TLS from servers that Aidan managed.

The culmination of Aidan's work was a capstone project that represented a full technology stack. In competition with a class of hundreds of students, Aidan placed in the top three projects and earned the coveted Ghirardelli award.

I heartily encourage you to give Aidan Von Feldt full consideration as Aidan has not only the technical skills necessary to thrive in your organization, but Aidan is easy to work with and would make a great member of any team. Please contact me if you have any questions concerning this recommendation.

Sincerely,

Lee S Jensen
